Organization, Terms, Conditions, Etc.

OUR POLICY:

Is to grow the best, regardless of cost. We are not satisfied unless you are, for your success means our progress. We appreciate your patronage.

VISIT OUR NURSERIES:

We have three principal growing grounds, or Nurseries, located at Morgan Hill, Santa Clara County; Santa Cruz, Santa Cruz County and Brentwood, Contra Costa County, with our Main Office, Floral Store and Salesyard at 2201-2205 The Alameda, San Jose, on the main San Francisco Highway, between San Jose and Santa Clara.

At Morgan Hill we have our propagation houses for cuttings and seedage, as well as lath-houses where all the stock in containers is grown. At this nursery we grow over three hundred thousand plants. The climate at Morgan Hill is warmer than most parts of Santa Clara Valley and with plenty of water is conducive to very favorable plant growth.

At Santa Cruz we have twelve acres where eighty thousand field grown, or "balled" plants are produced under most favorable growing conditions. This section was designated by the late Luther Burbank as being the best in California for the largest variety of plants.

At Brentwood, where we have four locations, all our deciduous fruit stock, roses and fruit tree seedlings are grown. On the highlands we grow the budded fruit trees and roses in loamy soil, while the seedlings are grown under Delta peat conditions. The former with plenty of water and heat produces ideal fruit trees in a section free from Peach Root Borer, and the latter, which is sub-irrigated, develops a splendid fibrous branched root system.

Our location at San Jose is the main distributing point and acts as a hub in the center of the nursery locations. We believe the favorable conditions under which our stock is grown and the years of experience back of our employees puts us in a position to cater to those who want the best.

TERMS

All prices are net; 5% discount for cash with order; 3% in ten days and 2% in 30 days. All bills due and payable 60 days from date of invoice, unless otherwise arranged. Remittance or satisfactory reference must accompany orders from unknown correspondents.

RATE

Quotations in this list will be furnished 5 at ten rate, 50 at hundred rate and 500 at thousand rate.

PACKING

Is done in the most careful way and a charge is made to cover cost of material only. Our packers have had many years' experience.

TRUCK DELIVERIES

REMEMBER! We have recently added a "Reo Master Speed Wagon" to our trucks, so we can make prompt deliveries better than ever.

CLAIMS

Of any kind will not be allowed unless reported within 10 days after receipt of stock.

GUARANTEE

While we exercise the greatest care to have all stock true to name, we give no warranty, express or implied, and in event that stock is proven not true to name, we shall be liable only for the sum paid for such stock.

CONTRACTS

We are in a position to grow larger quantities of any plant material in this catalog on contract. Think it over for future business; it will be worth while. Ornamentals—Fruit Trees—Seedlings.

NATIVE TREES

The stock of Native Trees and Shrubs we carry cannot be equalled in California. Our nurseries are recognized Headquarters for this class of stock. The demand for native stock is increasing each year and wherever a shortage of water exists this type of plants can be suggested. All natives are preceded with an asterisk (*).

EXPLANATION OF ABBREVIATIONS

B—Balled; B. R.—Bare Root; P—Pot; Qt.—Quart Can; Gal.—One Gallon Can; 2½ g.—Two and one-half Gallon Can; 5 g.—Five Gallon Can; Ft.—Feet, and In.—Inches.

APPRECIATION

We wish to take this means to express our sincere appreciation for the past patronage given us by our many wholesale customers, which has made this larger catalog possible. We will certainly endeavor to continue our policy in the future as we have in the past.

Evergreen Trees and Shrubs

Our evergreen trees and shrubs are grown under conditions which have been tested for years for the purpose of producing strong, healthy stock with a good root system that will stand up well when transplanted. All this stock is healthy and clean, being ready for resale to the most exacting customers.

| | 10 rate Each | 100 rate Each |
|---|-----------------|------------------|
| ABELIA grandiflora | | |
| 1 to 1½ ft. 4P..... | .35 | .25 |
| 2 to 3 ft. 5P..... | .45 | .35 |

NANDINA DOMESTICA
NANDINA domestica (Sacred Bamboo)

One of the most satisfactory plants grown. Foliage is light green, graceful, changing to a vivid red in fall and winter. Flowers white, in upright panicles, followed with scarlet-red berries. We have observed it growing remarkably well in shaded canyons, as well as in the interior valleys.

| | | |

Coniferous Evergreens

No salesyard is complete without a fair supply of the conifers. There is no question about the quality or permanency of this group, so with this in mind we have increased this department considerably within the last few years and the conditions at our Nurseries are ideal for the growing of these types.

Deciduous Flowering Trees

We are growing an exceptionally fine line of "Deciduous Flowering Trees" of many varieties, and have decided to list them separate from Deciduous Shade Trees and Shrubs for your convenience.

During the past season we found a heavy demand for this type of stock, especially those established in containers and in bloom. This list includes varieties that flower from February to late spring.

Grown in section not affected by "Peach Root Borer".

| | 10 rate Each | 100 rate Each |
|---|-----------------|------------------|
| AMYGDALUS communis (Large Flowering Almond, dbl. pink) | | |
| 3 to 4 ft. B-R..... | .50 | .40 |

a better place to live in**

Deciduous Trees and Shrubs

Deciduous ornamental shade or flowering trees and shrubs add a distinct charm to any planting, owing to their many changes in foliage and flower. These are usually sold with bare roots when dormant, but for the convenience of the retailer who wants to sell this class of stock before or after dormancy, we have listed many varieties in containers.

Fruit and Nut Tree Department

SEEDLINGS

This department has made considerable progress during the last few years, so much so in fact that we are practically sold out of our entire stock for this season, including our larger pear seedlings for inarching. However, we have made preparations to increase this department considerably over last year and expect to have much larger quantities for 1930-31 plantings. **Don't forget** the quarantine on French Pear, Mazzard, Apple and Quince goes into effect in July 1930 and on Mahaleb and Myrobolan in July 1931, so be prepared and send us your order in advance. Our Foreman at Brentwood, Marion E. Gregory, is the Pioneer Commercial Fruit Tree Seedling Grower of California, and is thoroughly capable of producing the best.

Following is what we have left at this time:

FRUIT TREE SEEDLINGS

| | | 1/4 in. | No. 1 | No. 2 | No. 3 |
|--------------------------------|----------|---------|-------|-------|-------|
| Cherry (Mahaleb) | Per 1000 | | 12.00 | 10.00 | 8.00 |
| Plum (Myrobolan) | Per 1000 | 12.00 | 10.00 | 8.00 | 6.00 |
| Quince (Rooted Cuttings) | Per 1000 | | 16.00 | | |
| Quince (Cuttings) | Per 1000 | | 5.00 | | |

ROSE STOCKS

| | | | |
|--------------------------|----------|-------|--------|
| Manetti (Cuttings) | Per 1000 | 20.00 | 5-9MM. |
| Odorata (Cuttings) | Per 1000 | 20.00 | 5-9MM. |

BUDED FRUIT TREES

As mentioned before in our introductory, our fruit trees are grown near Brentwood, Contra Costa County, where soil, water and climate are very satisfactory for the growing of Quality Stock. Also this section is free from the "Peach Root Borer" and our stock can be shipped anywhere.

Our assortment is especially selected for the "Home Orchard". It includes a succession of varieties in the different kinds.

10 rate 100 rate
Each Each

Floral Department

In connection with our main office and salesyard in SAN JOSE, we maintain a first class **Floral Store** in charge of Floral Artists.

Our stock is complete, and we can supply flowering and ornamental plants—cut flowers—floral pieces and floral work for all occasions, subject to our usual discount.

Orders accepted for all points in the Santa Clara Valley. Wire your instructions, or telephone Santa Clara 600.
